Favour O. Igwezeke

favour.igwezeke.249461@unn.edu.ng | favourigwezeke.github.io | LinkedIn | GitHub | Google Scholar | ORCID

Education

University of Nigeria, Nsukka — Nsukka, Nigeria
Doctor of Pharmacy (PharmD) — **Expected Feb. 2027**
CGPA: *4.21*/5.0 (Yr 1–5) · 4.58/5.0 (Yr 2–5)
Thesis: "Deep Learning–Based Behavioral and Anxiolytic Effects of the Methanol Stem Bark Extract of *Indigofera bracteolata* (DC.) in Wistar Rats"
Advisor: Assoc. Prof. Collins A. Onyeto, Dept. of Pharmacology & Toxicology, UNN

Research Interests

Biologically grounded representation learning; mechanistic and context-aware biomedical AI; uncertainty-aware reasoning and distribution shift in clinical and computational biology models; drug response prediction; perturbation modeling and transferability of biological representations.

Research Experience

SPARK (MICCAI-Endorsed Academy for African Medical Imaging Translation) — Remote
ML Research Fellow — Medical Imaging AI — Feb. 2026 – Sep. 2026

- **MORPHA** — Tested whether morphological priors improve cross-acquisition transfer in malaria microscopy; on Ugandan field data, reduced the transfer drop by 30.8% and halved calibration error, with a content-free control isolating morphology. *Accepted at the* **MIRASOL Workshop @ MICCAI 2026**; *forthcoming in Springer LNCS.* [Paper]

Cancer Research with AI (CaresAI) — Remote
Medical AI Researcher — Jan. 2026 – Present
Group Lead: Dr. Mary Adewunmi

- **Mechanism or Memorisation?** — Introduced **cross-endpoint relational support (R_X)**, a training-relative diagnostic separating entity-level familiarity from relationship-level support in DTI prediction; showed that high-R_X interactions achieve consistently higher matched AP and lower adjusted loss across three representation families on 80,094 BindingDB interactions. *Accepted at the* **ICBINB-BIO Workshop @ NeurIPS 2026**. [Paper]
- **CURE** — Developed an uncertainty-aware Graph-RAG system for evidence-grounded multihop biomedical reasoning; used **selective claim-level evidence verification**, backtracking, and abstention to study reliability under incomplete evidence. *Submitted to ML4H 2026, Proceedings Track.*
- **CT-DEB'26** — Developed an ensemble ML framework integrating four domain-specific BERT embeddings to predict medication dosing errors across 29,000+ ClinicalTrials.gov protocols. *Published at* **CL4Health @ LREC 2026**. [Paper]

Dept. of Pharmacology & Toxicology, University of Nigeria, Nsukka — Nsukka, Nigeria
Undergraduate Researcher — Computational Toxicology & Neuropharmacology — Nov. 2024 – Present
Supervisor: Assoc. Prof. Collins A. Onyeto

- **CellStateGRN** *(ongoing)* — Formulating a **perturbation-anchored causal representation framework** to identify shared regulatory programs and sparse state-specific rewiring across compensating and proliferating hepatocyte states in liver repair; planned validation against synthetic ground truth and evaluation on interventions withheld from model fitting.
- **TrajRisk** — Developed a **multi-scale directed GNN learning treatment-aware transitions** across hepatocyte injury trajectories (36,067 cells); resolved temporally distinct recovery phases distinguishing genuine resolution from persistent compensation and transferred zero-shot across species and modalities to human liver-failure injury regions. *Manuscript in preparation.*
- **Undergraduate Thesis:** Investigated anxiolytic effects of *Indigofera bracteolata* using DeepLabCut-based pose estimation (>94% accuracy); quantified dose-dependent effects (Cohen's d=0.8–1.3 at 600 mg/kg) across three behavioral paradigms; automated pipeline reduced analysis time 6×. *Paper under review at Journal of Pharmacological and Toxicological Methods.*
- Examined structure–toxicity relationships in 30 NSAIDs via unsupervised chemoinformatics; found non-hepatotoxic NSAIDs cluster within hepatotoxic chemical neighborhoods, implicating mechanistic over structural determinants of DILI. [Code]

African Society for Bioinformatics & Computational Biology / NIH ODSS — Remote
Bioinformatics Researcher — Dec. 2025 – Aug. 2026

- **absuite** — Developed an R/Bioconductor package (10 functions) for antibody repertoire profiling; validated on 3.4M sequences across COVID-19 and influenza cohorts, reproducing published convergent clonotypes at 98.8% concordance.

Accepted for presentation at **ISMB 2026** (oral), **BioC 2026** (oral), and **EuroBioC 2026** (poster). Package in preparation for Bioconductor submission.

Dept. of Pharmaceutical & Medicinal Chemistry, University of Nigeria, Nsukka — Nsukka, Nigeria
Undergraduate Researcher — Computational Drug Discovery — Sept. 2025 – Present
Supervisor: Prof. Charles O. Nnadi

- **CASPID** — Designed a context-aware neural conditioning framework across 23,248 EGFR/BRAF inhibitor–cell line pairs; learns context-dependent structural feature importance from cellular transcriptomic state, revealing interpretable MET-mediated bypass resistance patterns. *Manuscript in preparation for BMC Bioinformatics.* [Code]
- **TransQSAR-pf** — Developed a biology-informed QSAR framework integrating *P. falciparum* transcriptomic signatures with 125 compounds; 71.2% of predictive performance attributed to conserved stress-response genes over chemical descriptors alone. *Published in MDPI Engineering Proceedings.* [Paper] [Code] [Poster]

HackBio — Remote
Bioinformatics Research Intern — Next Generation Sequencing — Sept.–Nov. 2025
Supervisor: Dr. Adewale Ogunleye, PhD

- Performed guilt-by-association co-expression analysis on 69 HCC samples, identifying stage-specific lncRNAs tracking nivolumab+ipilimumab response, enriched in IFN/T-cell pathways, and validating a 12-lncRNA panel for monitoring immunotherapy progression. [Paper] [Code]

Genomac Institute Inc. — Remote
Cancer Genomics Research Intern — Jul.–Oct. 2025

- Performed multi-omics analysis of 123 meningioma samples (TCGA, cBioPortal), integrating somatic mutation and CNA data to validate TMB and CNA as candidate biomarkers for WHO-grade stratification. *Poster presented at ISPOR-HEOR UNN 2025 and CoGSAYR 2026.* [Code] [Poster] [Poster]

Person-Centered HIV Research Team (PeCHIVReT), University of Nigeria, Nsukka — Nsukka, Nigeria
Undergraduate Researcher — Clinical Epidemiology — Sept. 2024 – Present
Supervisor: Dr. AbdulMuminu Isah, PharmD, PhD

- Extracted and synthesized safety data from 113 HIV vaccine trials (1991–2024) for a systematic review; contributed to statistical analysis, evidence mapping, and manuscript preparation. *Paper under review at BMC Infectious Diseases.*

HackBio — Remote
Bioinformatics Intern — Cancer Genomics — Sept.–Nov. 2024

- Analyzed TCGA-BRCA and GBM RNA-Seq cohorts (1,200+ samples); identified three biomarkers (*CST5*, *CGA*, *MYL9*) with RF classification; GO/KEGG enrichment revealed biosynthetic dysregulation in gliomas. [Portfolio]

Awards, Honours & Fellowships

Jun. 2026 **ISMB 2026 Conference Fellowship**, International Society for Computational Biology (ISCB) — Competitive conference fellowship award ($1,500 USD)

Jun. 2026 **BioC 2026 Travel Scholarship**, Bioconductor Conference — $550 USD travel award + complimentary registration

Mar. 2026 **Okwuchukwu Fund Research Award**, UNN — NGN 120,000 competitive grant for undergraduate thesis research (1 of 3 recipients)

Dec. 2025 **ABI Travel Fellowship**, African Bioinformatics Institute — Full support, CoGSAYR Africa Summit, Lagos

Nov. 2025 🏆 **Gabriel Ezenri Award for Excellence in Research 2.0 — 2nd Place** (NGN 110,000), ISPOR-HEOR UNN

Feb. 2025 🏆 **Gabriel Ezenri Award for Excellence in Research — 1st Place** (NGN 100,000), ISPOR-HEOR UNN

Feb. 2025 **1st Runner-up**, ISPOR-HEOR UNN Clinical Skills Evaluation Competition

Nov. 2024 **Research Fellow**, Toufik's World Medical Association Research Fellowship in Neurology

Nov. 2024 **Udacity × Bertelsmann Next Generation Tech Booster Scholarship** — Top 500 worldwide ($1,200 USD)

Sept. 2024 **HackBio Precision Medicine Premium Scholarship** — Selected 5 of 200+ applicants

Oct. 2023 **YandyTech × DataCamp Donates Data Science Scholarship** ($399 USD)

Software

absuite — R/Bioconductor package for antibody repertoire profiling and clonotype analysis
10 analytical modules; validated on 3.4M BCR sequences across COVID-19 and influenza cohorts; in preparation for Bioconductor submission.

Service & Teaching

Academic Service

Reviewer, Africa in AI Workshop at NeurIPS 2026
Reviewer, Machine Learning for Health (ML4H) Symposium 2026
Scientific Program Committee Member, Machine Learning in Computational Biology (MLCB) 2026

Teaching Experience

Peer Academic Tutor, University of Nigeria, Nsukka 2024–2025
Tutored 37 students in genetics, chemistry, and statistics; co-created 30+ study guides and question banks used by over half of the Pharmacy Class of 2026.

Technical Skills

Programming	Python (PyTorch, TensorFlow, scikit-learn, RDKit), R (DESeq2, limma, Bioconductor), SQL, PySpark
Bioinformatics	TCGA/cBioPortal, GSEA, AlphaFold, PubChem API, TCGAbiolinks, AIRR/IMGT/OAS formats
ML/AI Methods	Transformers, GNNs, QSAR, Dimensionality Reduction (PCA, t-SNE), Clustering, Boruta
Cloud & DevOps	AWS, Docker, Git, HPC (Compute Ontario)

Professional Development

Jul. 2025 **Cohere Labs ML Summer School** — Transformers, diffusion models, self-supervised learning; faculty from Google DeepMind, Meta AI (FAIR), Adobe, INRIA, MIT. [Certificate]

Jun. 2025 **Compute Ontario Summer School** — HPC, bioinformatics pipelines (RNA-Seq), cloud computing, Docker/Git. [Certificate]
